PROBLEMS THIS SOLVES

Eliminated Spreadsheet Chaos

Billing, payments and cost planning scattered across Excel and WhatsApp. Now one system, one source of truth per event.

Real-Time Payment Visibility

Overdue payment cycles flagged on the dashboard automatically. No more daily calls to check if an advance was received.

Profit Known Before Execution

Pre-cost planning shows projected P&L before the event runs. No more discovering a loss after the caterers have gone home.

Complete Accountability Trail

Every change stored with timestamp, device and IP. Disputes resolved in seconds with full field-level history.
